

Block Scheduling

ROCK subscribers have access to Study Schedules. These are schedules containing weekly study assignments for residents.

The default study schedule does not contain any blocks or groups of assignments. However, program directors and program coordinators may create these groups or blocks to enable easier resequencing of the schedule.

To create a group or block of assignments and a study schedule, from the main navigation menu, select Study Schedule.

USER GUIDE

After grouping or blocking Weekly Assignments in a Study Schedule, additional customization options include modifying the chapters assigned per weekly assignment, resequencing assignments, or cloning the study schedule to create a new iteration.

Remember, a Study Schedule must be <u>assigned</u> by Program Directors or Coordinators and of the current year or Study Cycle for residents to see it and receive Weekly Assignments.
